

Easy Sell Page™ Price List

Page Set Up Process

Setting up an Easy Sell Page requires only that you send in the content items you want to be accessed from the page. For example, if you have a video presentation, some brochures, a spec sheet or price list, all you have to do is ship these items to us and we'll install them on your new ESP. At that stage, we'll contact you to review the page and modify the placement of the items, if necessary, and decide on the page background color.

We also have a password control feature to protect price lists and other confidential information. This can be useful if, for example, you're doing a mailing to prospective buyers in your distribution channel and you want them to see your price list. Simply furnish the password in your mailing and they'll be able to view and print the document to the exclusion of everyone else. This puts vital information in their hands quickly and easily with no additional work (faxing or emailing documents) on your part.

Prices
